

Saving Money and Reducing Emissions At Home

Transition to high-efficiency electric heating, cooking, hot water systems, appliances, and electric vehicles, all powered by renewable electricity, to effectively reduce pollution and carbon emissions to zero. For many households, rebates and incentives can help make pay for upgrades to reduce your energy consumption and greenhouse gas emissions.

Below are key steps you can take and links to information on federal tax incentives supporting them included in the 2022 Inflation Reduction Act:

- 1** Solar Panels
[30% tax incentive](#)
- 2** Insulated Walls, Floors and Attic
